Convention Center**

GLOBAL GATEWAY

TAKANAWA GATEWAY CITY is an international hub for exchange and innovation, forming a “Global Gateway” that will bring together people from the surrounding areas, from across Japan, and from around the world. Designed as an integrated station-area development, the district invites a diverse range of people, information, and cultures to interact on a daily basis, generating new value. As one of the city’s core facilities, the TAKANAWA GATEWAY Convention Center serves as a venue for international business events and academic conferences, and plays a key role in showcasing the city’s vitality to the world. In addition, in close coordination with the city, efforts are underway to promote “City-wide MICE” using a wide range of media throughout TAKANAWA GATEWAY CITY for events, including outdoor event spaces such as Gateway Park (the plaza in front of the station), digital signage, and in-station advertising spaces.

A lush, green space for relaxation unfolds in front of the station

As you exit the ticket gates at Takanaawa Gateway Station, an expansive plaza —Gateway Park— opens up in front of you. This iconic plaza, which offers a different look in each season, stands as a symbol of the city and provides a sense of openness and comfort despite its location in the heart of the metropolitan area.

The Convention Center is directly connected to the station

The Center is accessible via a covered walkway from the station ticket gates, allowing umbrella-free access even on rainy days. Its location adjacent to the traffic plaza also enables smooth access by car. The facility features accessible routes throughout, making it far easier to get around.

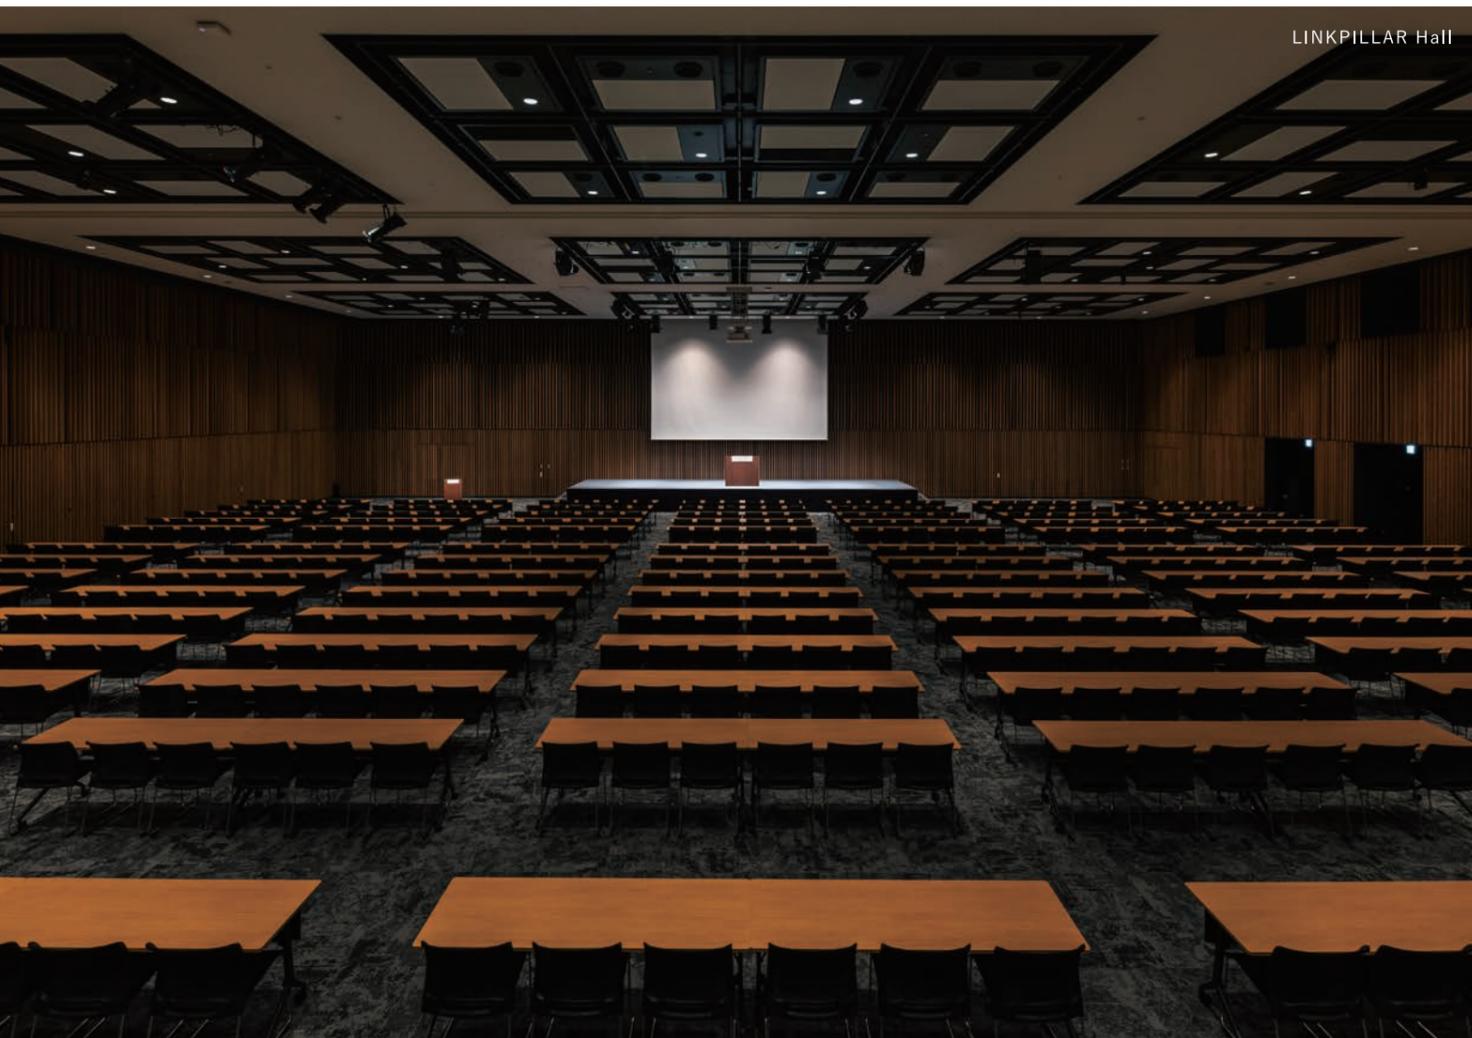

CONVENTION FLOOR

3D Virtual Tour

A refined, highly functional space designed around LINKPILLAR Hall

LINKPILLAR Hall, one of the largest multipurpose halls in central Tokyo directly linked to a station, is suitable for a wide range of events. In addition to the large-scale hall and the stately atrium foyer, the venue also incorporates a number of user-friendly features throughout its backstage area, and other administrative spaces, as well as loading and unloading facilities—all designed to help ensure the success of your event.
